

# Radiological Physics and Technology

Volume 11, Number 2, June 2018

## REVIEW ARTICLE

### Overview on subjective similarity of images for content-based medical image retrieval

Chisako Muramatsu . . . . . 109

## RESEARCH ARTICLES

### Tilted-wire method for measuring resolution properties of CT images under extremely low-contrast and high-noise conditions

Chiaki Tominaga, Hiroki Azumi, Mitsunori Goto, Masaaki Taura, Noriyasu Homma, Issei Mori . . . . . 125

### Evaluation of surface dose and image quality using the half-scan mode in chest computed tomography-guided interventional radiology: a phantom study

Hiroaki Hasegawa, Jiro Sato, Ikuo Kobayashi . . . . . 138

### Effective-dose estimation in interventional radiological procedures

Maria D. Falco, Salvatore Masala, Matteo Stefanini, Paolo Bagalà, Daniele Morosetti, Eros Calabria, Alessia Tonnetti, Gianluca Verona-Rinati . . . . . 149

### Quantitative $T_1$ and $T_2^*$ carotid atherosclerotic plaque imaging using a three-dimensional multi-echo phase-sensitive inversion recovery sequence: a feasibility study

Yasuhiro Fujiwara, Hirotochi Maruyama, Kanako Toyomaru, Yuri Nishizaka, Masahiro Fukamatsu . . . . . 156

### Commissioning and validation of fluence-based 3D VMAT dose reconstruction system using new transmission detector

Yuji Nakaguchi, Takeshi Oono, Masato Maruyama, Yoshinobu Shimohigashi, Yudai Kai, Yuya Nakamura . . . . . 165

### Effect of region extraction and assigned mass-density values on the accuracy of dose calculation with magnetic resonance-based volumetric arc therapy planning

Keisuke Usui, Keisuke Sasai, Koichi Ogawa . . . . . 174

### Dosimetric changes with computed tomography automatic tube-current modulation techniques

Sofia Spampinato, Anna Maria Gueli, Pietro Milone, Luigi Angelo Raffaele . . . . . 184

### Output factor determination based on Monte Carlo simulation for small cone field in 10-MV photon beam

Kyohei Fukata, Satoru Sugimoto, Chie Kurokawa, Akito Saito, Tatsuya Inoue, Keisuke Sasai . . . . . 192

### Myocardial motion analysis based on an optical flow method using tagged MR images

Daiki Tabata, Haruo Isoda, Kaori Kato, Hiroki Matsubara, Takafumi Kosugi, Takashi Kosugi, Masaki Terada, Atsushi Fukuyama, Yoshiaki Komori, Shinji Naganawa . . . . . 202

### Body size and tube voltage-dependent guiding equations for optimal selection of image acquisition parameters in clinical X-ray imaging

Xiaoming Zheng . . . . . 212

### Quantitation of specific binding ratio in $^{123}\text{I}$ -FP-CIT SPECT: accurate processing strategy for cerebral ventricular enlargement with use of 3D-striatal digital brain phantom

Akihiro Furuta, Hideo Onishi, Hizuru Amijima . . . . . 219

### Utility of the variable flip angle 3D fast-spin echo (isoFSE) sequence on 3T MR for diagnosing vertebrobasilar artery dissection

Masaki Ogawa, Shingo Omata, Hirohito Kan, Nobuyuki Arai, Marehiko Asai, Misugi Urano, Yuta Shibamoto . . . . . 228

## TECHNICAL NOTES

### Usefulness of model-based iterative reconstruction in semi-automatic volumetry for ground-glass nodules at ultra-low-dose CT: a phantom study

Shuki Maruyama, Yasuhiro Fukushima, Yuta Miyamae, Koji Koizumi . . . . . 235

### Estimation of linear energy transfer distribution for broad-beam carbon-ion radiotherapy at the National Institute of Radiological Sciences, Japan

Nobuyuki Kanematsu, Naruhiro Matsufuji, Taku Inaniwa . . . . . 242

### Reduction of respiratory ghosting motion artifacts in conventional two-dimensional multi-slice Cartesian turbo spin-echo: which k-space filling order is the best?

Yuuji Inoue, Masami Yoneyama, Masanobu Nakamura, Atsushi Takemura . . . . . 248

**Susceptibility difference weighted imaging in vertical-field MRI**

Ryota Sato, Toru Shirai, Yo Taniguchi, Takenori Murase, Yoshitaka Bito, Yoshihisa Soutome, Hisaaki Ochi . . . . . **255**

**CORRECTIONS**

**Correction to: Influence of Gd-EOB-DTPA on proton density fat fraction using the six-echo Dixon method in 3 Tesla magnetic resonance imaging**

Tatsuya Hayashi, Kei Fukuzawa, Hiroshi Kondo, Hiroshi Onodera, Shuji Toyotaka, Rie Tojo, Shimpei Yano, Masakatsu Tano, Tosiaki Miyati, Jun'ichi Kotoku, Takahide Okamoto, Keiko Toyoda, Hiroshi Oba . . . . . **262**

**Correction to: Estimation of linear energy transfer distribution for broad-beam carbon-ion radiotherapy at the National Institute of Radiological Sciences, Japan**

Nobuyuki Kanematsu, Naruhiro Matsufuji, Taku Inaniwa . . . . . **263**
