

Radiological Physics and Technology

Volume 13, Number 4, December 2020

RESEARCH ARTICLES

Dosimetric evaluation with knowledge-based planning created at different periods in volumetric-modulated arc therapy for prostate cancer: a multi-institution study	
Hajime Monzen, Mikoto Tamura, Yoshihiro Ueda, Jun-ichi Fukunaga, Tatsuya Kamima, Yuta Muraki, Kazuki Kubo, Kiyoshi Nakamatsu	327
Evaluation of dose reduction potential in scatter-corrected bedside chest radiography using U-net	
Shu Onodera, Yongbum Lee, Yoshitaka Tanaka	336
Iterative framework for image registration and partial volume correction in brain positron emission tomography	
Keisuke Matsubara, Masanobu Ibaraki, Miho Shidahara, Toshibumi Kinoshita, on behalf of for the Alzheimer's Disease Neuroimaging Initiative.	348
Single-plate method for practical modulation transfer function measurement in magnetic resonance imaging	
Rei Yoshida, Yoshio Machida	358
New image-restoration method using a simultaneous algebraic reconstruction technique: comparison with the Richardson–Lucy algorithm	
Kenya Murase	365

TECHNICAL NOTES

A simple method for the automatic classification of body parts and detection of implanted metal using postmortem computed tomography scout view	
Yuya Wada, Junji Morishita, Yongsu Yoon, Miki Okumura, Noriaki Ikeda	378
Examination of cross-calibration and concentration linearity with quantitative gallium-67 single-photon emission computed tomography: phantom experiment	
Yoshiyuki Takahashi, Tatsuya Tsuchitani, Mitsuhiro Shibayama, Takashi Ikeda, Noriko Kotoura, Kazuhiro Kitajima	385
Parametrization of in-air spot size as a function of energy and air gap for the ProteusPLUS pencil beam scanning proton therapy system	
Suresh Rana, Anatoly B. Rosenfeld	392
Characterization of Gamma Knife Perfexion™ source based on Monte Carlo simulation	
J. Junios, I. Irhas, N. Novitrian, E. Soediatmoko, F. Haryanto, Z. Su'ud, A.L. Fielding	398
Systolic modified Look–Locker inversion recovery myocardial T1 mapping improves the accuracy of T1 and extracellular volume fraction measurements of patients with high heart rate or atrial fibrillation	
Hirohiko Shinbo, Satoshi Tomioka, Toshihiko Ino, Keiko Koyama	405

CORRECTIONS

Correction to: Systolic modified Look–Locker inversion recovery myocardial T1 mapping improves the accuracy of T1 and extracellular volume fraction measurements of patients with high heart rate or atrial fibrillation	
Hirohiko Shinbo, Satoshi Tomioka, Toshihiko Ino, Keiko Koyama	414
Correction to: A simple method for the automatic classification of body parts and detection of implanted metal using postmortem computed tomography scout view	
Yuya Wada, Junji Morishita, Yongsu Yoon, Miki Okumura, Noriaki Ikeda	415

ACKNOWLEDGMENT

Acknowledgment	416
